

Connecting GiveMeGreen! App to Your Bluetooth Scanner

Steps

1. Turn scanner ON by clicking the ON/OFF button on the side once (blue light on top will flash once)
2. Launch GiveMeGreen! app
3. Go to SETTINGS page from top right corner
4. Select *Bluetooth Scanner*
5. Select *Connect to New Device*
6. Enter <Device Code> from label on Bluetooth Scanner (or leave blank) in *Connect to Bluetooth Scanner* dialog box
7. Select OK
8. Wait 30 seconds for *Connecting to Device...* to complete
9. If connection succeeds, a green light will flash once on the scanner and the page will update to show the information of the current connection, including the *Device Name* of the scanner.
10. If connection fails, *Connection Unsuccessful* dialog box appears
 - i. Check that scanner is turned ON
 - ii. Check that scanner is within 5 feet of phone
11. After you press START on the home screen there will be a green banner present that says *Scanner Connected*.
12. On future launches of the GiveMeGreen! app, the app will automatically connect to the scanner if the scanner is ON and in range. Otherwise return to the *Bluetooth Scanner* settings page and select the row under *Previously Connected Devices* to reconnect to the scanner.
13. To turn scanner OFF, hold down ON/OFF button for at least 7 seconds until the blue light appears, then release. The scanner will also power itself off after about 30 seconds if the app is not connected.
